

## APR40 / APR70 Pressure Regulator

This protection valve is designed to be installed before applications like reverse osmosis systems, drinking water systems, liquid dispensers, refrigerators, ice makers and many other applications requiring water pressure for system operation. The quick connect fitting application makes it easy to use and user friendly.

### Key Features:

- Fits standard 1/4" tubing used on most RO systems
- Reduces and limits the water pressure to 40 psi (APR40) or 70 psi (APR70)
- Protects the water filtration system by stabilizing the water pressure
