Product Function

This product is a reminder device for tracking the usage time and service life of iSpring water filter cartridges.

It is designed for working with the following iSpring models:

RCC series: RCC7, RCC7AK, RCC7AK-UV, RCC7D, RCC1D, RCC7U

RCCP Series: RCC7P, RCC7P-AK, RCC1UP, RCC1UP-AK, RCC100P, RCC1DP

Others: RO100, PH100, RCT600, RCS5T, RCB3P

Users' Instructions

This device is powered by 4 (four) AAA 1.5 V alkaline batteries (NOT included). Switch to "ON" to start the countdown timer. Switch to "OFF" to turn off the timer.

When the power is on, the timer automatically starts operating and enters Stand-by mode. The green stand-by indicator light will flash every 30 seconds.

The red indicator light stays on and emits a beeping sound.

Indicators	Lifespan (months)	Corresponding Filter Replacement
PP	3	PP Sediment Filters
GAC/CTO	6	Activated Carbon Filters
RO	24	Reverse Osmosis Membranes
FT15/AK/UV	12	ALL filters located after the reverse osmosis membrane, including but not limited to post-carbon filters (FT15, FT15B), alkaline filters (FA15), and UV bulbs (UVB11, if equipped)

Low Battery Alert Status

When the battery is low, the product will emit a continuous low voltage alert sound until the battery is replaced. The stand-by indicator will stop flashing.

Resetting the Alarm Alert

1. The alarm alert sound will last for 1 minute. If not canceled by pressing the RESET button, it will repeat every 3 hours for 1 minute.
2. During the alarm alert, the standby indicator light stops flashing, but the alarm system continues to work.
3. Short press the RESET button briefly to reset the indicator lights and alarm that is currently active. Only the current filter life indicator will be reset. The standby indicator light will continue to flash.
4. Press and hold the RESET button for 5 seconds to cancel the indicator lights and alarm alert sound. This will reset the timer completely and all filter life indicators will start over the count-down. The four timer status indicator lights will flash twice and emit a startup sound, clearing the current timer immediately.
5. Turning off the product's power will interrupt the timer, but it will NOT reset the current time recording. The timer will continue counting when powered back on.

iSpring Standard Limited Warranty (End-Users Only)

In order to be eligible for this warranty, the end-user must register at www.ispringfilter.com.

For all water filtration systems, and upon registration by the end-user, iSpring Water Systems, LLC (iSpring) warrants for a one year from the date of purchase that the product is free of defects in materials and workmanship and that it will function for the duration of the warranty according to its specifications (the "Limited Warranty"). EXCEPT FOR THIS LIMITED WARRANTY, ISPRING EXPRESSLY DISCLAIMS ANY AND ALL REPRESENTATIONS AND WARRANTIES, WHETHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTIES OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. iSpring has no liability for any defect or deterioration which results from the improper installation, service, repair or use of the product. End-user's sole and exclusive remedy for any breach of the Limited Warranty shall be repair or replacement, at iSpring's option and expense. This warranty is only provided to end-users and only applies to products purchased directly from an authorized iSpring dealer or reseller.

Warranty Registration

iSpring does not have access to order information from 3rd party selling channels, and it is strongly recommended to manually fill in the order information upon registering for warranty. Please contact our support team at

support@ispringfilter.com

if there are any questions or concerns about the product and its installation. Your satisfaction is our business! Please consider supporting us by leaving an honest product review on the channel where the product was purchased. It means a lot to us. Thank you for being an iSpring customer.

NOTE: This does NOT apply to any filter cartridge, as the life expectancy varies based on incoming water quality.
